

DANIEL GORGIS

SOFTWARE DEVELOPER

PERSONAL PROFILE

I am an introvert.. it is important to know that i love to speak and interact with my colleagues. I enjoy coding a lot and spent a lot of my spare time on hobby projects. Other than that i live with my better half in a small apartment in Solrød strand. The past couple years I have developed an interest in Mechanical engineering and therefore spent my spare time Soldering raspberry Pi's and coding sensors to interact with eachother.

TECHNOLOGIES

- Python
- ASP.NET
- JAVA / JAVA EE
- Node, Nodejs, Reactjs
- HTML/CSS
- Django, Flask, Express
- Docker, Kubernetes
- Redhat, Openshift
- AWS,Google, IBM Cloud, MongoDB
- Postgres, SQL, noSQL
- Hardware, Raspberry pi, Arduino

CAREER SUMMARY

IBM Client Innovation Center

SOFTWARE CONSULTANT

- August 2019 - Now

DSA / DSR

INTERN

- March 2018 - Juli 2018

FVA

SOFTWARE DEVELOPER

- November 2017 - April 2018

It is no lie that my main experience comes from my job at IBM. Here I have worked with various technologies and programming languages. As a consultant you tend to learn new stuff every week. Therefore it can be tough to keep track all your learnings. On the other hand it gives you a lot of insight on many different ways of working and thinking. Solving issues becomes easier with the knowledge about multiple systems and frameworks. At DSA i worked with C# and asp.net. This was a great experience for building knowledge about the architecture and Database handling in code. Here I also had my first experiences as a member of a agile workflow.

ACADEMIC HISTORY

KEA Copenhagen Academy

COMPUTER SCIENCE

- 2017-2019
